To whom it may concern,

The Health and Safety Department within Wincanton Group Limited has been working closely with Mobile Safety Solutions since October 2007.

In this time, we conducted a full trial of the software offered by MSS and subsequently had meetings to identify bespoke requirements for the solution which allow it to fit 100% to our organisations requirements.

We now have a powerful fully functional system that fits the requirements of our company and specifically our departments needs perfectly. We are now entering the final stages of the project and plan to launch this initiative internationally

MSS have worked diligently and responded to our requests with a well received "can do" attitude along the way. This has been instrumental in forging good long-term relationships between both companies.

Yours sincerely

Garry Spicer  
Group Health and Safety Advisor
